OBJECTIVE

Aspiring computer networking and cybersecurity student with a strong foundation in IT support, networking, IT Security and troubleshooting. Pursuing a B.Sc. (Hons) in Computer Networking and Cybersecurity at Islington College, affiliated with London Metropolitan University. Experienced at configuring and managing network devices, diagnosing system issues, and implementing security measures. Passionate about providing technical support and ensuring system reliability. Skilled in Windows/Linux administration, cybersecurity principles, and problem-solving. Eager to apply knowledge in a dynamic security/network/system intern.

EDUCATION

Bsc.(Hons) Computer Networking and IT Security

Islington College, Kathmandu
London Metropolitan University

2023 - Present

Intermediate level (+2)

Sainik Awasiya Mahavidhyalaya Bhaktapur, Sallaghari

2021 - 2023

Secondary Education Examination

Sainik Awasiya Mahavidyalaya, Teghari, Kailali

2020

SKILLS

SOFT SKILLS

- Communication
 - Problem-Solving
 - Time Management
 - Teamwork
 - Leadership
 - Project Management
 - Presentation Skill
 - Research Skill
 - Documentation Skill
-

TECHNICAL SKILLS

- Programming Skills: HTML, CSS, JavaScript, Java, Python
 - Database: MySQL
 - Other Technologies:
 - Design: Canva, Filmora
 - Network Configuration & Management: Configured Router and Switch
 - Windows/Linux administration
 - Active Directory Management
 - User Account & Permission Administration
 - System Administration (Windows Server)
 - Cybersecurity principles
 - Cybersecurity tools: Kali Linux, BTLo, Try hack me, cyberdefenders, Immersive lab
-

WORK EXPERIENCE

Worked as an IT Support Intern at Islington College, Kathmandu from 25 February to 14 November 2025.

During my internship as an IT Support Intern at Islington College, I gained hands-on experience in both technical and soft skills. I developed strong communication skills by explaining technical issues and solutions to students and teachers. My ability to work effectively in a team was enhanced through collaboration with the IT team during system setups, troubleshooting, and software installations. I also strengthened my problem-solving and time management skills by independently resolving technical issues and managing multiple support tasks under tight deadlines. Additionally, I honed my adaptability by quickly adjusting to new tools and technologies used in the organization, and improved my presentation skills by sharing technical updates in team meetings.

Technically, I gained valuable experience in router and switch configuration, assisting in the setup of small office networks, and worked on a LAN setup for the Skills Mela event at Tudikhel. I also handled system administration tasks using Active Directory to manage user accounts and permissions. My troubleshooting skills were sharpened as I diagnosed and repaired hardware and software issues across various devices. Furthermore, I gained practical knowledge in clamping, punching, and crimping for network cable management, preparing cables for network installations, ensuring proper functionality and continuity.

PROJECTS (PERSONAL / ACADEMIC)

Website UI Design

- Designed an intuitive and user-friendly interface for an e-commerce website.
- Designed a responsive website for my own hotel.
- Designed a digital portfolio website.
- Utilized tools like Figma for prototyping and design implementation.
- Skill: HTML, CSS, Java Script

Furniture Management System

- Develop a computerized system for the furniture management system.
- Implemented the create, read, update, and delete (CRUD) operation.
- Skill: Python

Store Management System

- Designed a graphical user interface (GUI) for the store management system.
 - Implemented Java Swings components, Event Handling, Exception Handling
 - Focused on the Object-Oriented Programming (OOP) Principle.
 - Skill: Java
-

LPG gas leakage detection system with auto cut off regulator using Arduino

- **Showcased the project twice in college: Final Year Project (FYP) and IoT Showcase 2025.**
- Developed an embedded safety system to detect LPG leakage using gas sensors (MQ-2).
- Implemented automatic shut-off functionality using a servo-controlled regulator to prevent accidents.
- Integrated buzzer alerts and LCD display for real-time leakage notifications.
- Programmed the Arduino microcontroller for sensor calibration, threshold detection, and emergency response.
- Skill: Arduino, Embedded Systems, C/C++ Programming

Currently working on Network Threat Detection Project for FYP
